

## Dr. Michal Goralski Dr. Keith Morley

pediatric dentists

*Proudly serving our colleagues and the children of Simcoe-Muskoka.*

***"We are the local experts in Pediatric Oral Health and General Anesthesia."***

**Here to Help & Serve Our Community. We have done so for decades.**

Care for children can be difficult and time consuming, not to mention stressful. We are here to relieve that burden so you can focus on more enjoyable and productive aspects of your practice.

- ☑ We accept referrals for pediatric patients upto 12-years-old.
- ☑ Not every child needs an anesthetic - We have a full range of treatment options from behaviour management to anesthesia and everything in between.
- ☑ Two Pediatric Dentists, two Specialist Medical Anesthesiologists, ten support staff and four nurses - We are the local specialists in pediatric oral health and anesthesia.
- ☑ Patients are instructed to continue regular care with their family dentist after treatment is finished.

***Not every child needs a general anesthetic. But when they do, we have the expertise to provide it promptly & safely.***

Full-time Staff at RVH Dept. of Anesthesia  
Board Certified Medical Anesthesiologist  
Past Chairman of OMA Section on Anesthesia  
30+ years of hospital anesthesia practice

***"A Dental Specialist for the Dentistry and a Medical Specialist for the Anesthesia."***

- ☑ Two doctors for every case. Medical Anesthesiologist to focus on the anesthesia and Pediatric Dentist to focus on the dental treatment.
- ☑ Over ten thousand pediatric dental cases under general anesthesia, all safely treated.
- ☑ The convenience and availability of a fully accredited and purpose-built surgi-centre with a 15 year safety record. Need treatment fast? We can accommodate at the surgi-centre.
- ☑ Hospital GA access for medically complex cases and patients where cost is a concern. Did you know that OHIP covers the cost of general anesthesia for dental treatment in hospital?
- ☑ All four doctors live in Barrie and are integrated into the local health community and hospital. They are local and accessible should questions or complications arise post-operatively.
- ☑ Why anesthesia? Parents often prefer treatment under general anesthetic because they miss less work and school, avoid dental anxiety for the child, and get a fresh start quickly so that they can focus on caries prevention and good oral health.
